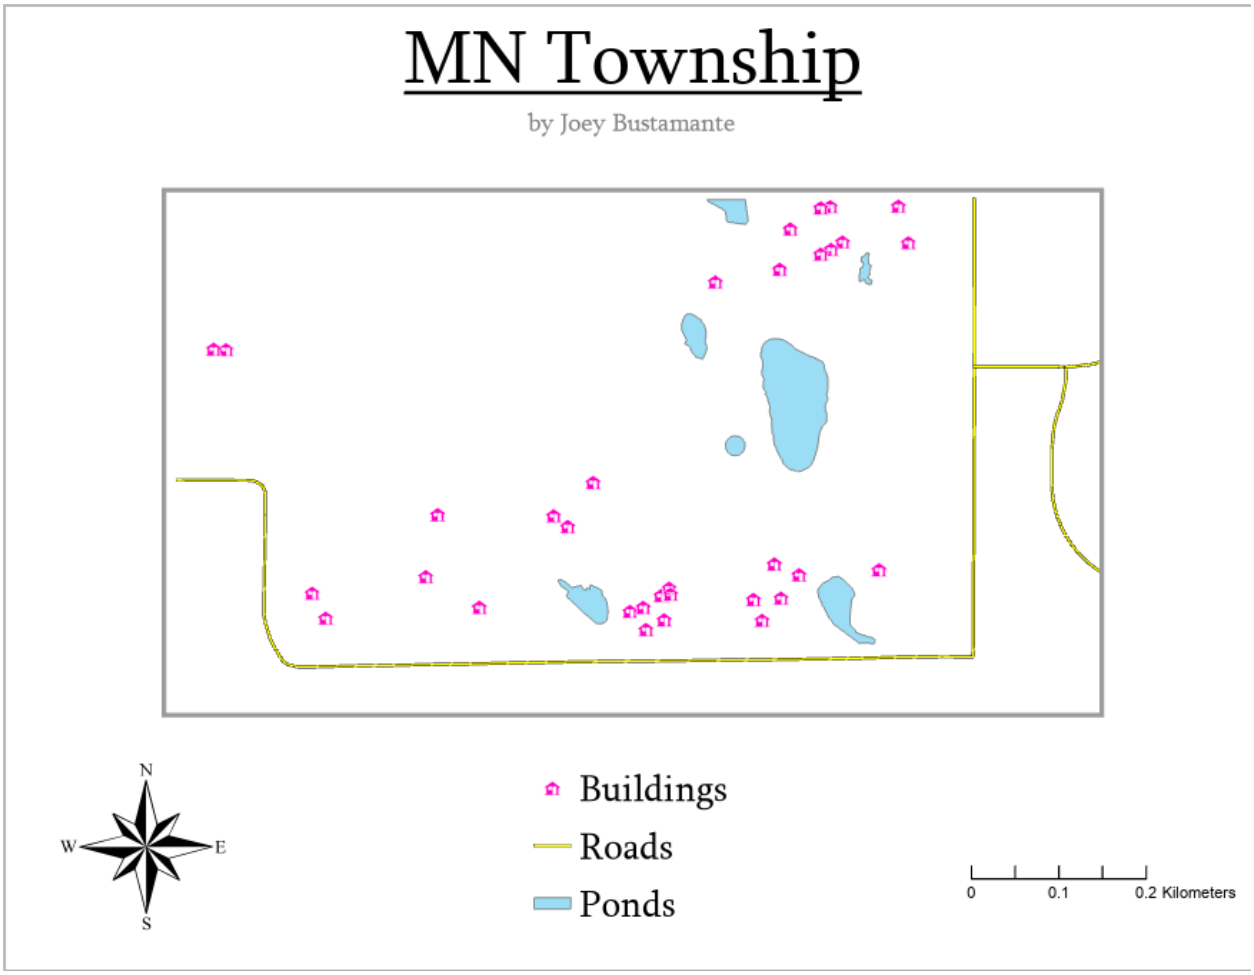
Intro to GIS Lab 5

Name: Jose (Joey) Bustamante

QUESTION 1: Submit a screenshot of your basic layout. No need to export the map as a pdf or jpg. Also remember, you don't need to do all of the houses.

Answer:



QUESTION 2: Submit your exported layout of your created map for the folks by Ninepipe. Submit this as a second PDF to the assignment page.

No submission here. Submit your map as a second PDF

QUESTION 3: Submit a screenshot of your created polygons that you made using the autocomplete. They should look similar in shape to the image above, but set your symbology to unique colors and your transparency to 50%. There should be no gaps or overlaps in your polygons

Answer:

QUESTION 4: Submit a screenshot of your created polygons that you made using merge and split. Again, give them unique colors and set transparency to 50%.

Answer:

QUESTION 5: Submit a screenshot similar to the second screenshot with the topology errors filled. Use a different color scheme for your data. Describe the process you used to correct the topology.

Answer: In order to correct the Topology I used the Error Inspector as my guide whether that was to create features for land coverage, moving vertices on roads so that they are gap free and finally I used the polygon merge tool to merge two landcover polygons to get rid of polygon lines in the landcoverage.
